Working experience

HEADING INGÉSUP APPLE LAB - SEPT 2013..NOW

We're a team growing every year (about 20 now), and we have one day every two weeks to learn, share and create cool things around iOS and Mac. This a really good experience for me to teach what I know about Swift, Objective-c or whatever to others student and help them building great apps. This is also an opportunity to manage a team and multiple projects at the same time.

APPLE WWDC 2014 SCHOLARSHIP RECIPIENT - JUNE 2014

Every year, Apple choose around 200 student in the world to give them a free ticket for the WWDC. I've been selected by doing an original iOS application based on a Penrose triangle menu that I've open sourced on my Github (Kemcake/RSPenrose).

INTERNSHIP AND PART-TIME AT WOPATA - 2014/2015 (1 YEAR)

Creating javascript applications using modern frameworks like Angular or React, implementing data-visualisation with D3. Build solid automated projects with Gulp or Grunt, and unit-tested with Karma, Jasmine or Mocha. I also helped to build the iOS app Boddy, redesigning the interface like the main screen, and implementing features like video conference.

CREATE A SOCIAL NETWORK : LOOPSE - 2013

I wanted to create a social network for extreme sports users (surf, snowboard, skateboard ...). An app to find the best places to practice, to organize events and invite our friends. Available on almost every platforms : www.loopse.com.

INTERNSHIP AT SNAPP' - 2013

3 months internship at SNAPP' as iOS developer. Realisation of iPhone applications such as "Nokia Expert" application to have all the information about Nokia products, or "Tag Wine" for details of a wine by scanning its label. Recovery of existing projects with "SmartCave" and "Ticket Restau". All available on the AppStore.

LOTS OF DIFFERENT PROJECTS - 2010..NOW

As I love to imagine and create new ideas, I did some (a lot) projects. That's, I think, the best way to learn again and again. I've put most of them in the "portfolio" of my website. I'm really proud of every apps I've made, since the first one "BDN" until the last one "#Captain".

Languages

French as native. Professional skills in english, improving my fluidity.

Additional information

- Inline skate France champion 2011(sponsored by clic-n-roll.com). Really athletic in general, and music lover (piano and guitar).
- Animate some conferences about iOS/Animations/Parse in my school or at meetups.
